EDUCATION

University of Pittsburgh, Pittsburgh PA — Graduation: May 2025
Bachelors of Science in Information Science, Minor in Music — GPA 3.43

RELEVANT EXPERIENCE

Junior Data Analyst — December 2025 - September 2026
Chemistry Agency – Pittsburgh, PA

- Collaborated with UX, Development, SEO, Strategy, Paid Media, Account Management, and Project Management teams to provide data analysis, reporting, and technical analytics support across client projects, including client-facing presentations and post-launch performance reporting.
- Analyzed digital performance across 20+ client accounts, conducting analytics audits and recurring/ad hoc reporting on traffic, engagement, conversions, user behavior, and measurement performance to identify key insights and recommendations.
- Built Domo, and Looker Studio dashboards from scratch, transforming and visualizing client data into accessible performance metrics, comparisons, and reporting tools for internal teams and clients.
- Supported Google Analytics and Google Tag Manager implementations across client websites, including tag, trigger, and variable configuration, pixel and Floodlight troubleshooting, UTM tracking, measurement setup, and identification of measurement opportunities.
- Prepared and standardized data for Marketing Mix Modeling by integrating sources including GA4, Google Trends, and client CMS platforms such as Shopify and WordPress; cleaned and transformed datasets using Python and Excel for integration into analytics tools.

Operations Intern — June 2024 – August 2024
BNY Mellon – Pittsburgh, PA

- Rotated through multiple functions within the Global Payments and Treasury Services team, gaining hands-on experience with the department's systems and process automation.
- Developed and implemented a Python-based automation tool that optimized case assignments in the ECRM system, reducing a manual 1.5-hour process to a few minutes.
- Supported day-to-day ECRM operations in other various areas, including data governance, AI engineering, client services, and other payment processing systems such as wire transfers and Zelle

Infrastructure Operations Intern — May 2023 - August 2023
ConnectiveRx – Pittsburgh, PA

- Supported enterprise infrastructure projects and IT needs across business and technology teams.
- Administered Five9, Salesforce, and Microsoft 365 tools, providing user support and managing access permissions.
- Resolved 300+ help desk tickets using ManageEngine and led projects including SharePoint development, BIOS updates, asset management, and IT security enhancements.

CAMPUS INVOLVEMENT

Official Association for Students of Information Science

- President — April 2024 – Jan 2025
    - Led organization operations, representing the interests of Information Science students at the University of Pittsburgh.
    - Organized professional development initiatives, IT and data analytics workshops, networking events, and guest speaker sessions while collaborating with student organizations, faculty, and School of Computing and Information administration.
